Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 7, 16, 22 and 61 of U.S. Patent No. 6,173,210. Although the conflicting claims are not identical, they are not patentably distinct from each other because the organization elements in the claims are their functionality are merely obvious variations of each other.

The elements in claim 1 are covered by claims 1 and 7 of the patent .

The elements in claims 10 and 19 are covered by claims 16 and 22 of the patent.

The elements in claims 28 and 29 are covered by claims 61 and 22 of the patent.

The element of claims 2-9, 11-18 and 20-27 are covered by claims 8-15 of the patent.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of

the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Coggins (U.S. Patent 5,367,622).

Regarding claim 30, Coggins discloses a graphical user interface (Fig. 1) for displaying a template having fields (Fig. 2, step 102) and for receiving inputs in the fields (Fig. 9) and defining dimensions of the equipment (column 2, lines 12-28), wherein the graphical user interface associated graphical information illustrating how to obtain the information with the fields in the templates (column 6, lines 27-52), wherein the graphical user interface verifies the completeness and type of data in each field in the template (column 2, lines 45-57) and means for providing dimensional verification information indicating exacted dimensions for each of the fields in the template (column 3, lines 20-36).
